

A FANTASTIC NEIGHBOURHOOD WATCH TOOL ON OFFER

By now we hope that you have received your UV Marker Kit and we're sure some of you are scratching your heads wondering what it's for. We can assure you, it is a great crime prevention tool and you are the key for it protecting your community right across the Territory.

SO WHAT IS THE KIT AND HOW DOES IT WORK?

Use the UV pen to mark your property with the letters NT and your driver's licence number on items of value such as your phone, camera, laptop, iPad, iPod, TV, DVD player, etc. Write it where it is not likely to be rubbed off. Use the torch to check what you've written.

If your items are stolen and end up in Police hands, they can use a UV torch to see your licence number and get the items returned to you as soon as possible.

We recommend you put the window stickers up, so would be thieves know your house is 'marked.'

The pen will mark property for 5—10 households, so once you've marked your goods please pass it on to your neighbours, friends and family.

HAPPY MARKING!
